-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 7, & 13 are rejected under 35 U.S.C. 102(e) as being anticipated by Casey (US 5999273).

Re claims 1, 7, & 13, Casey et al. discloses (column 5, lines 4-44; column 7, line 64 - column 8, line 13) an arrangement for an image writing system that produces image dots at a series of focus dot positions whereby the writing level of a dot at a focus dot position is adjusted to a modified gray level based on the pixel density of the focus dot position and the pixel densities of pixels adjacent to the focus dot position.

Further re claims 1, 7, & 13, in one case (column 5, lines 4-44), the adjustment is performed in response to the detection of a dot at the focus dot position and the detection of no dot

adjacent to the focus dot position. This adjustment is performed to thicken a too-thin black line (i.e. a case where a black pixel is adjacent to a white pixel), and is not performed when this occurrence is not detected; thus, the dot at the focus dot position will be at one (adjusted) level when this occurrence is detected and at a different (non-adjusted) level when this occurrence is not detected.

***Allowable Subject Matter***

3. Claims 2, 8, & 14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter:

Re claims 2, 8, & 14, the art of record does not teach or suggest the claimed selective dot expansion to the left or the right in conjunction with detection or non-detection of a particular occurrence for write level modification based on focal point and adjacent pixel densities.

***Conclusion***

5. Any inquiry concerning the contents of this communication or earlier communications from the examiner should be directed to Stephen M. Brinich at 571-272-7430.
